

VOLUME 1

# Clinical Periodontology and Implant Dentistry

Fifth Edition

**Jan Lindhe**

Niklaus P. Lang • Thorkild Karring

Editors

**Blackwell  
Munksgaard**

# Contents

[Contributors](#)

[Preface](#)

## **[Volume 1: BASIC CONCEPTS](#)**

### **[Part 1: Anatomy](#)**

#### **[1 The Anatomy of Periodontal Tissues](#)**

[Introduction](#)

[Gingiva](#)

[Periodontal ligament](#)

[Root cementum](#)

[Alveolar bone](#)

[Blood supply of the periodontium](#)

[Lymphatic system of the periodontium](#)

[Nerves of the periodontium](#)

#### **[2 The Edentulous Alveolar Ridge](#)**

[Clinical considerations](#)

[Topography of the alveolar process](#)

[Alterations of the alveolar process following tooth extraction](#)

[Topography of the edentulous ridge](#)

#### **[3 The Mucosa at Teeth and Implants](#)**

[The gingiva](#)

[The peri-implant mucosa](#)

Probing gingiva and peri-implant mucosa

Dimensions of the buccal soft tissue at implants

Dimensions of the papilla between teeth and implants

Dimensions of the “papilla” between adjacent implants

#### **4 Bone as a Tissue**

Basic bone biology

Local and systemic factors affecting bone volume and healing

Bone healing

#### **5 Osseointegration**

The edentulous site

Osseointegration

Implant installation

Cutting and non-cutting implants

The process of osseointegration

#### **6 Periodontal Tactile Perception and Peri-implant Osseoperception**

Introduction

Neurophysiological background

Trigeminal neurophysiology

Periodontal innervation

Testing tactile function

Periodontal tactile function

Functional testing of the oral somatosensory system

From periodontal tactile function to peri-implant osseoperception

Conclusions

## **Part 2: Epidemiology**

### **7 Epidemiology of Periodontal Diseases**

Introduction

Methodological issues

Prevalence of periodontal diseases

Risk factors for periodontitis

Periodontal infections and risk for systemic disease

## **Part 3: Microbiology**

### **8 Oral Biofilms and Calculus**

Microbial considerations

General introduction to plaque formation

Dental plaque as a biofilm

Structure of dental plaque

Dental calculus

### **9 Periodontal Infections**

Introduction

Historical perspective

Current suspected pathogens of destructive periodontal diseases

The nature of dental plaque – the biofilm way of life

Prerequisites for periodontal disease initiation and progression

Mechanisms of pathogenicity

Effect of therapy on subgingival biofilms

### **10 Peri-implant Infections**

[Introduction](#)

[Early biofilm development on implant surfaces](#)

[Time of implant exposure and climax community complexity](#)

[The microbiota on implants in edentulous subjects](#)

[The microbiota on implants in partially edentulous subjects](#)

[The microbiota on implants in subjects with a history of periodontal disease](#)

[The microbiota of peri-implantitis sites](#)

## **Part 4: Host–Parasite Interactions**

### **11 Pathogenesis of Periodontitis**

[Introduction](#)

[Clinically healthy gingiva](#)

[Gingival inflammation](#)

[Different lesions in gingivitis/periodontitis](#)

[Host–parasite interactions](#)

[Host defense processes](#)

### **12 Modifying Factors**

[Diabetes mellitus](#)

[Puberty, pregnancy, and the menopause](#)

[Tobacco smoking](#)

### **13 Susceptibility**

[Introduction](#)

[Evidence for the role of genetics in periodontitis](#)

[A gene mutation with major effect on human disease](#)

and its association with periodontitis  
Disease-modifying genes in relation to periodontitis  
Disease-modifying genes in relation to implant failures  
and peri-implantitis  
Conclusions and future developments

## **Part 5: Trauma from Occlusion**

### **14 Trauma from Occlusion: Periodontal Tissues**

Definition and terminology  
Trauma from occlusion and plaque-associated periodontal disease  
Analysis of human autopsy material  
Clinical trials  
Animal experiments

### **15 Trauma from Occlusion: Peri-implant Tissues**

Introduction  
Orthodontic loading and alveolar bone  
Bone reactions to functional loading  
Excessive occlusal load on implants  
Static and cyclic loads on implants  
Load and loss of osseointegration  
Masticatory occlusal forces on implants  
Tooth–implant supported reconstructions

## **Part 6: Periodontal Pathology**

### **16 Non-Plaque Induced Inflammatory Gingival Lesions**

Gingival diseases of specific bacterial origin

[Gingival diseases of viral origin](#)  
[Gingival diseases of fungal origin](#)  
[Gingival lesions of genetic origin](#)  
[Gingival diseases of systemic origin](#)  
[Traumatic lesions](#)

## **17 Plaque-Induced Gingival Diseases**

[Classification criteria for gingival diseases](#)  
[Plaque-induced gingivitis](#)  
[Gingival diseases associated with endogenous hormones](#)  
[Gingival diseases associated with medications](#)  
[Gingival diseases associated with systemic diseases](#)  
[Gingival diseases associated with malnutrition](#)  
[Gingival diseases associated with heredity](#)  
[Gingival diseases associated with ulcerative lesions](#)  
[Treatment of plaque-induced gingival diseases](#)  
[The significance of gingivitis](#)

## **18 Chronic Periodontitis**

[Clinical features of chronic periodontitis](#)  
[Overall characteristics of chronic periodontitis](#)  
[Gingivitis as a risk for chronic periodontitis](#)  
[Susceptibility to chronic periodontitis](#)  
[Prevalence of chronic periodontitis](#)  
[Progression of chronic periodontitis](#)  
[Risk factors for chronic periodontitis](#)  
[Scientific basis for treatment of chronic periodontitis](#)

## **19 Aggressive Periodontitis**

Classification and clinical syndromes

Epidemiology

Etiology and pathogenesis

Diagnosis

Principles of therapeutic intervention

## **20 Necrotizing Periodontal Disease**

Nomenclature

Prevalence

Clinical characteristics

Diagnosis

Histopathology

Microbiology

Host response and predisposing factors

Treatment

## **21 Periodontal Disease as a Risk for Systemic Disease**

Early twentieth century concepts

Periodontitis as a risk for cardiovascular disease

Periodontitis as a risk for adverse pregnancy outcomes

Periodontitis as a risk for diabetic complications

Periodontitis as a risk for respiratory infections

Effects of treatment of periodontitis on systemic diseases

## **22 The Periodontal Abscess**

Introduction

Classification

Prevalence

Pathogenesis and histopathology

[Microbiology](#)  
[Diagnosis](#)  
[Treatment](#)  
[Complications](#)

## **23 Lesions of Endodontic Origin**

[Introduction](#)  
[Disease processes of the dental pulp](#)  
[Effects of periodontal disease and periodontal therapy on the condition of the pulp](#)

## **Part 7: Peri-implant Pathology**

## **24 Peri-implant Mucositis and Peri-implantitis**

[Definitions](#)  
[Ridge mucosa](#)  
[Peri-implant mucosa](#)  
[Peri-implant mucositis](#)  
[Peri-implantitis](#)

## **Part 8: Tissue Regeneration**

## **25 Concepts in Periodontal Tissue Regeneration**

[Introduction](#)  
[Regenerative periodontal surgery](#)  
[Periodontal wound healing](#)  
[Regenerative concepts](#)  
[Assessment of periodontal regeneration](#)

## **Volume 2: CLINICAL CONCEPTS**

## **Part 9: Examination Protocols**

### **26 Examination of Patients with Periodontal Diseases**

History of periodontal patients

Signs and symptoms of periodontal diseases

Diagnosis of periodontal lesions

Oral hygiene status

Additional dental examinations

### **27 Examination of the Candidate for Implant Therapy**

Dental implants in periodontally compromised patients

Patient history

Local examination

Patient-specific risk assessment

### **28 Radiographic Examination of the Implant Patient**

Introduction

Radiographic examination for implant planning purposes – general aspects

Radiographic examination for implant planning purposes – upper jaw examination

Radiographic examination for implant planning purposes – lower jaw examination

Radiographic monitoring of implant treatment

Image-guided surgery

### **29 Examination of Patients with Implant-Supported Restorations**

Identification of the presence of implants and implant systems

Clinical inspection and examination

Technical failures/complications

Function

Implant

Soft tissues

Esthetics

### **30 Risk Assessment of the Implant Patient**

Principles of risk assessment

Local risk factors and conditions

Systemic risk factors

Importance of behavioral considerations in risk assessment

Interest and commitment to post-treatment care and maintenance program

## **Part 10: Treatment Planning Protocols**

### **31 Treatment Planning of Patients with Periodontal Diseases**

Screening for periodontal disease

Diagnosis

Treatment planning

Case report

### **32 Treatment Planning for Implant Therapy in the Periodontally Compromised Patient**

Prognosis of implant therapy in the periodontally compromised patient

Strategies in treatment planning

Treatment decisions – case reports

### **33 Systemic Phase of Therapy**

Introduction

Protection of the dental team and other patients against infectious diseases

Protection of the patient's health

Prevention of complications

Systemic diseases, disorders or conditions influencing pathogenesis and healing potential

Control of anxiety and pain

Smoking counseling

## **Part 11: Initial Periodontal Therapy (Infection Control)**

### **34 Motivational Interviewing**

The importance of behavioral change counseling in periodontal care

Development of motivational interviewing

Evidence for motivational interviewing

Implementation of motivational interviewing into the periodontal treatment plan

Case examples for oral hygiene motivation

Case example for tobacco use cessation

### **35 Mechanical Supragingival Plaque Control**

Importance of supragingival plaque removal

Self-performed plaque control

Importance of instruction and motivation in

mechanical plaque control

### **36 Chemical Supragingival Plaque Control**

Classification and terminology of agents

The concept of chemical supragingival plaque control

Chemical plaque control agents

Chlorhexidine

Evaluation of chemical agents and products

### **37 Non-surgical Therapy**

Introduction

Detection and removal of dental calculus

Methods used for non-surgical root surface debridement

The influence of mechanical debridement on subgingival biofilms

Implication of furcation involvement

Pain and discomfort following non-surgical therapy

Re-evaluation

Prediction of outcome and evaluation of treatment

Full-mouth disinfection

## **Part 12: Additional Therapy**

### **38 Periodontal Surgery: Access Therapy**

Introduction

Techniques in periodontal pocket surgery

Distal wedge procedures

Osseous surgery

General guidelines for periodontal surgery

Outcome of surgical periodontal therapy

### **39 Treatment of Furcation-Involved Teeth**

Terminology

Anatomy

Diagnosis

Differential diagnosis

Therapy

Prognosis

### **40 Endodontics and Periodontics**

Introduction

Infectious processes in the periodontium of endodontic origin

Iatrogenic root perforations

Vertical root fractures

External root resorptions

### **41 Treatment of Peri-implant Lesions**

Introduction

The diagnostic process

Treatment strategies

Cumulative Interceptive Supportive Therapy (CIST)

### **42 Antibiotics in Periodontal Therapy**

Principles of antibiotic therapy

Evaluation of antibiotics for periodontal therapy

## **Part 13: Reconstructive Therapy**

## **43 Regenerative Periodontal Therapy**

Introduction

Classification and diagnosis of periodontal osseous defects

Clinical indications

Long-term effects and benefits of regeneration

Evidence for clinical efficacy and effectiveness

Patient and defect prognostic factors

The relevance of the surgical approach

Barrier materials for regenerative surgery

Bone replacement grafts

Biologically active regenerative materials

Membranes combined with other regenerative procedures

Root surface biomodification

Clinical strategies

## **44 Mucogingival Therapy – Periodontal Plastic Surgery**

Introduction

Gingival augmentation

Root coverage

Interdental papilla reconstruction

Crown-lengthening procedures

The deformed edentulous ridge

## **45 Periodontal Plastic Microsurgery**

Microsurgical techniques in dentistry (development of concepts)

Concepts in microsurgery

Clinical indications and limitations

Comparison to conventional mucogingival interventions

## **46 Re-osseointegration**

Introduction

Is it possible to resolve a marginal hard tissue defect adjacent to an oral implant?

Is re-osseointegration a feasible outcome of regenerative therapy?

Is the quality of the implant surface important in a healing process that may lead to re-osseointegration?

## **Part 14: Surgery for Implant Installation**

### **47 Timing of Implant Placement**

Introduction

Type 1: placement of an implant as part of the same surgical procedure and immediately following tooth extraction

Type 2: completed soft tissue coverage of the tooth socket

Type 3: substantial bone fill has occurred in the extraction socket

Type 4: the alveolar ridge is healed following tooth loss

Clinical concepts

### **48 The Surgical Site**

Bone: shape and quality

[Implant placement](#)  
[Anatomic landmarks with potential risk](#)  
[Implant position](#)  
[Implant direction](#)  
[Healing time](#)

## **Part 15: Reconstructive Ridge Therapy**

### **49 Ridge Augmentation Procedures**

[Introduction](#)  
[Patient situation](#)  
[Bone morphology](#)  
[Soft tissue morphology](#)  
[Augmentation materials](#)  
[Long-term results](#)  
[Clinical concepts](#)  
[Future developments](#)

### **50 Elevation of the Maxillary Sinus Floor**

[Introduction](#)  
[Treatment options in the posterior maxilla](#)  
[Sinus floor elevation with a lateral approach](#)  
[Sinus floor elevation with the crestal approach  
\(osteotome technique\)](#)  
[Short implants](#)  
[Conclusions and clinical suggestions](#)

## **Part 16: Occlusal and Prosthetic Therapy**

### **51 Tooth-Supported Fixed Partial Dentures**

Clinical symptoms of trauma from occlusion  
Tooth mobility crown excursion/root displacement  
Treatment of increased tooth mobility

## **52 Implants in Restorative Dentistry**

Introduction

Treatment concepts

Indications for implants

Increase the subjective chewing comfort

Preservation of natural tooth substance and existing functional, satisfactory reconstructions

Replacement of strategically important missing teeth

## **53 Implants in the Esthetic Zone**

Basic concepts

Anterior single-tooth replacement

Multiple-unit anterior fixed implant restorations

Conclusions and perspectives

## **54 Implants in the Posterior Dentition**

Basic concepts

Restoration of the distally shortened arch with fixed implant-supported prostheses

Multiple-unit tooth-bound posterior implant restorations

Posterior single-tooth replacement

Clinical applications

Concluding remarks and perspectives

## **55 Implant–Implant and Tooth–Implant Supported**

## **Fixed Partial Dentures**

Introduction

Initial patient assessment

Implant treatment planning for the edentulous arch

Prosthesis design and partially edentulous tooth replacement therapy

Tooth–implant fixed partial dentures

## **56 Complications Related to Implant-Supported Restorations**

Introduction

Clinical complications in conventional fixed restorations

Clinical complications in implant-supported restorations

Other issues related to prosthetic complications

## **Part 17: Orthodontics and Periodontics**

### **57 Tooth Movements in the Periodontally Compromised Patient**

Orthodontic tooth movement in adults with periodontal tissue breakdown

Specific factors associated with orthodontic tooth movement in adults

Gingival recession

Minor surgery associated with orthodontic therapy

### **58 Implants Used for Orthodontic Anchorage**

Introduction

[Evolution of implants for orthodontic anchorage](#)  
[Prosthetic implants for orthodontic anchorage](#)  
[Orthodontic implants as temporary anchorage devices](#)

## **Part 18: Supportive Care**

### **59 Supportive Periodontal Therapy (SPT)**

[Definitions](#)

[Basic paradigms for the prevention of periodontal disease](#)

[Patients at risk for periodontitis without SPT](#)

[SPT for patients with gingivitis](#)

[SPT for patients with periodontitis](#)

[Continuous multi-level risk assessment](#)

[Objectives for SPT](#)

[SPT in daily practice](#)

## **Part 19: Halitosis**

### **60 Halitosis Control**

[Introduction](#)

[Diagnosis](#)

[Therapy](#)
